

Asansol Municipal Corporation has taken action plan to prevent loss / misuse of water in the following manner:-

1. To reduce the number of existing street taps (approximately 50%) in the ensuring one year, since the maximum waste/misuse of water occurs through public street taps because of individual house connection in the particular area. Apart from that bib cock will be fixed where no bib cock exists to reduce loss/misuse of water.
2. All commercial connections will be provided with water meter to control total supply of water within six months.
3. All Apartment buildings will also be provided with water meter to control supply of water within one year.
4. All residential connections will be provided with water meter to regulate and control use of use of water beyond the allowable quantity within next five years.
5. The Corporation authorities, since the production cost of water is increasing enormously day by day, intend to initiate public awareness programmes in order to highlight the necessity of taking preventive measures regarding loss/misuse of water.
